Todd Simmons
GENERAL MANAGER

March 22, 2024

The Honorable Jennifer M. Granholm
Secretary, U.S. Department of Energy
1000 Independence Avenue, SW
Washington, DC 20585

Re: Grid Resilience and Innovation Partnership 2024: Western Region Wildfire Resiliency (W2R2) Alliance

Dear Secretary Granholm,

Tillamook People's Utility District (Tillamook PUD), with our community partners, is writing this letter in support of PacifiCorp's W2R2 project and their grant application for funding through the U.S. Department of Energy Grid Resilience & Innovation Partnership (GRIP) program. Our interests align with W2R2's commitments to mitigate the increasing risk of extreme weather and wildfire and to invest in the economic strength and resilience of our communities.

PacifiCorp's Sugarloaf transmission line supplies electricity to three Tillamook PUD substations located in the northern portion of our rural community, serving a combination of 7,751 residential customers and 651 commercial customers. Included in the commercial customer grouping are many small coastal businesses, restaurants, farmers, and grocery stores. Additionally, two critical healthcare providers, two major Ports of transit, and five City governmental agencies with first responder and public works responsibilities are located within this area.

It is imperative we provide reliable electric service to our communities. When the Sugarloaf transmission line is inoperable due to weather events or unforeseen issues, all of these customers are without electricity, often for a duration of six to eight hours. Our public entities and healthcare providers must have access to life-saving equipment and public safety supplies that require electricity.

Tillamook PUD relies on PacifiCorp to provide safe and continuous transmission of electricity. This is challenging as the Sugarloaf transmission line is nearly 80 miles long and traverses heavily forested areas. We have a collaborative relationship with PacifiCorp and in power outage situations they respond as quickly as they can. However, they must dispatch PacifiCorp personnel from outside the region to respond, which increases the time to assess conditions. The infrastructure improvements proposed through this project would help to mitigate power interruptions and also lessen power outage durations. PacifiCorp's inclusion of remote sensing and control equipment to quickly respond based on localized data and information is critical to our communities.

Tillamook PUD is eager to support PacifiCorp in implementation of the W2R2 project. Tillamook PUD urges your support for W2R2; we look forward to the many benefits it will provide in our community and throughout the region. Thank you for your time and attention.

In Support of the W2R2 Project,

Todd Simmons
General Manager
