Shake
Out

Great ShakeOut Earthquake Drills

Earthquakes are unpredictable and may happen where you live, work, or travel.

Most injuries in earthquakes are from falling or flying objects.

Today we are joining millions of people worldwide who are practicing how to be safe during earthquakes

It is Important to Recognize there are times that Evacuation is Life-Saving.

By participating in these exercises, individuals and organizations can better understand the gravity of

- 1) The Importance of Individual Preparedness
- 2) Create a Plan and Understand Your Role
- 3) Practice “What to Do.”

Disaster Prevention Tour

Miyako
2026-2048

There are things that can be conveyed only by the people of the region, which has recovered from the damage caused by numerous tsunamis in the past

Taro after being hit by tsunami

Purpose of Disaster Prevention Tour

During the Disaster Prevention Tour, we take participants up to the seawall to show the current situation in the Taro area, which was severely damaged by the Great East Japan Earthquake and tsunami, and to tell about the situation at that time. Through this program, visitors can learn about the record of the disaster and the lessons learned through disasters, as well as view footage of the tsunami going into the Taro Kanko Hotel.

The aim of this tour is to convey the fear of natural disaster to as many people as possible, and to raise

Learning about disaster prevention on the seawall

Communicating Risk and Building Resilience through ShakeOut Drills

"Drop, Cover, and Hold On"

Core Initial Message:

- Protect Yourself from falling debris during an earthquake.
- Know Your Evacuation Plan
- Know where and how to get to Your Safe Place

Time to ShakeOut!

1

DROP!

2

COVER!

3

HOLD ON!

Community Engagement:

ShakeOut drills encourage community participation, fostering a sense of shared responsibility and preparedness.

Awareness and Education:

The drills raise awareness about earthquake risks and educate participants about earthquake and tsunami safety. There are also other reasons for evacuation such as wildfire, landslides, flooding, etc.

Practice and Repetition:

Regular practice of the "Drop, Cover, and Hold On" and then "Evacuate" techniques, help make these actions **automatic** during an earthquake and tsunami.

"People will do what they have practiced."

**Promote preparedness
at all levels:**
The drills encourage
individuals, families,
businesses, schools, and
communities to prepare for
Evacuation (Wildfires,
Landslides, Flooding,
Earthquake and Tsunami,
etc.)

Importance of Communication:

Sign Up for “Emergency Alert Notifications”

[Everbridge Emergency Alert Notification Link](#)

ShakeOut emphasizes the need for effective communication during and after an earthquake for

- a. Individuals
- b. Families, and
- c. Emergency Responders

International Participation:

The Great ShakeOut is a global event, demonstrating the universal need for earthquake preparedness in order to save lives. This is an awareness event with Millions of people participating - world, nation, state and countywide.

TC4 has added the component of Evacuation to the GSO because we live on the coast; high-risk hazard.

Important to Understand:

- Everyone is likely to be Impacted
- Those in the Flood Zone must immediately evacuate “Up” to Safety such as Assembly Area.
- Those above the Flood Zone likely will have home damage; not safe to reenter.
 - “Camp at Home” (live in vehicles or evacuate to predetermined Assembly Area.)
 - Evacuation will be on foot

Personal Preparedness is Critical.

- **Go-Bag**
 - Shelter (Tarp, Poncho, etc)
 - Food
 - Water (Filter)
 - Medication
 - Communication
 - Reunification Plan with Family
 - Money

Preparedness is how we Achieve Resilience!!

Outcomes of Previous Tillamook County TC4 GSO Exercises

Communication:

- Development of Active Ongoing Communications Education and Training
- Distribution of Solar Go-Boxes Countywide (Coordinated by John Beaston, Till Co Aux Comm)

Community Reality that “Normal Responders” will Not be Available:

- Importance of Personal Preparedness.
- Unified Media Packet message Countywide
- Community preparedness for Flooding, Earthquake/Tsunami Responses including Evacuation.

2023: 455 Participants

2024: 741 Participants

2025: 3921 Participants!!

Goal for 2026

Increase Tillamook County Community Resilience

Goal:

Effectively communicate the Importance of

1. Prepare
2. Plan
3. Practice

Objectives:

1. Recognize there are times when Evacuation is Life Saving
2. Prepare - Internalize/Understand the importance of Individual Preparedness
3. Plan - Create a Plan and Understand Your Role
4. Practice "What to Do."

Earthquake & Tsunami (Tidal Wave) Information

Who, What, Where, When, Why and How

Who: Everyone may need to evacuate to a safe place.

What: Evacuate due to earthquake ground movement causing unsafe structures, downed power lines, outages, ruptured water and sanitation pipes, and potential water inundation (tidal wave) from high waves.

Where: Pre determine your "safe location" out of the inundation (tidal wave) zone; and/or outside of your home structure. Where are your emergency supplies stored?

When: Evacuate immediately after the shaking stops, or when safe to do so. Do not return until authorities confirm it is safe.

Why: To ensure safety and access to a designated safe place. Your Go-Bag may be all you have - Include the essentials - Shelter, water, food and communication.

How: Evacuate on foot, as roads will likely be impassable due to road damage, or obstructions such as trees, power lines, debris. Aim to reach high ground within 10-15" .
